Institutional Review Board Approved

Informed Consent Form

Phase III Cardio-Renal Study

INFORMED CONSENT FOR RESEARCH PARTICIPATION

1. PARTICIPANT AND STUDY INFORMATION

Participant Name

Study ID

Protocol Version

Site Name

2. PURPOSE OF THE STUDY

The purpose of this clinical trial is to evaluate whether an investigational therapy can improve outcomes for adults with combined cardiovascular and renal disease. If you agree to participate, the study team will monitor your health during scheduled visits and compare study results across participants in a controlled research setting.

3. STUDY PROCEDURES

If you agree to participate, you may complete screening assessments, provide medical history information, undergo laboratory testing, and attend follow-up visits for ongoing safety and efficacy monitoring. The study team will explain what each visit includes before any procedure is performed.

- (a) Screening evaluations to confirm that you qualify for the study;
- (b) Scheduled visits for physical assessments, laboratory review, and medication monitoring;
- (c) Collection of study-related data that will be used only for approved research purposes.

4. RISKS AND BENEFITS

Participation in this study may involve risks and discomforts such as side effects from study medication, discomfort from blood draws or examinations, and the possibility that the treatment will not benefit you. There may also be unknown risks that researchers do not yet understand.

You may or may not receive a direct medical benefit from participation. However, information learned during the trial may help researchers and future patients with similar cardio-renal conditions.

5. VOLUNTARY PARTICIPATION

Your participation is voluntary. You may choose not to join the study or to leave the study at any time. Your decision will not affect your regular care or benefits to which you are otherwise entitled.

6. CONFIDENTIALITY

Information collected during this study will be handled confidentially and shared only with authorized research staff, the study sponsor, and oversight authorities as permitted by law. Results may be reported in aggregate, but your identity will not be published.

7. CONTACT INFORMATION

Please contact the study coordinator or principal investigator if you have questions about the study, your rights as a participant, or a study-related injury. You should receive a signed copy of this consent form for your records.

-
- ☐ I have read and understand this informed consent form in its entirety
 - ☐ I have had the opportunity to ask questions, and my questions have been answered to my satisfaction
 - ☐ I voluntarily agree to participate in this research study
 - ☐ I understand I will receive a signed copy of this consent form
